Leafy Spurge

What is Leafy Spurge?

Leafy spurge is a non- native plant that is extremely aggressive and is spreading in Salt Lake County. This Utah Noxious weed,

- Contains a toxic sap that can cause severe skin dermatitis and blindness in animals and humans
- Can grow as deep as 26 feet, making this plant difficult to control once established
- Can throw its' seeds up to 15 feet
- Crowds out native plants and displaces wildlife
